On nov. 8, 2004 the applicant had to go out of town to make the prototype and let a friend wait for the letter from US patent. When the applicant got there the applicant tried to unload a band saw from the car and cause a sprain to the back. The next morning the applicant could not even put on his shoes and later went to see the doctor. The doctor told the applicant not to lift any thing and I should call my family doctor. I did call the family doctor next morning and talked to his assistance and they said there is nothing you can do just take the medicine. Also the applicant went to check up last year the doctor bill came to \$7000 still nothing they can do about applicant back problem. When applicant's friend received the letter he could not reach the applicant. It took a while to talk to applicant. The applicant was too ill to go out of state and moving all heavy machinery that hard to get near the original drawing from storage . The applicant are 52 year old been having serious back pain and this invention are made special for the applicant.

To Whom It May Concern:

RE: Annop Magness

The above patient is presently under our medical care. He had history of back pain, but haven't been seen in our office during the relevant period—beginning March 24, 2004. He reported that he have contacted our office to be seen, but unable to come in to see us due to the fact that he is living in Fresno at that time.

Your consideration for his request will be greatly appreciated.

Sincerely,

P. Basil Vasantachart, MD
Medical Director
